RRS

High resistance to impact and weathering makes Acu-Rural HDPE pipe ideal for the most demanding applications. These lightweight coils enable fast installation with minimum joints.

Acu-Rural poly pipe comes in imperial sizes to suit the industry standard requirements and existing pipelines. Rural compression fittings are also in imperial size, although adaptors to metric pipe sizes are readily available.

This high quality pipe manufactured in Australia will remain robust even in harsh environments and guaranteed to last a long lifespan due to it's high impact strength and UV resistance.
